

## **GOVERNMENTS, CORPORATIONS, and CRIMINALS**

are fighting for control over the Internet and your data. What can you do to protect your private data in our online world?

This free community event will help you learn how to use the Internet in a way which respects your privacy and keeps you in control of your personal information.

Bring a laptop and your public key if you have one, and a sense of curiosity as we learn how to keep our information private and defend against those who would monitor or steal it.

### **Topics include:**

- Why do we need privacy? What do we have to hide? How is our privacy at risk?
- Securing email with encryption and trust networks
- Tutorials, setup demos, discussions, questions and answers

**Food and Drinks** will be available in limited quantities. Please consider bringing more food or drinks to share and help make this event a success. Pizza, soda, and beer are encouraged!
